An additional measurement for shirts and blouses. You can check this by measuring your neck just below your Adam's apple - very carefully, of course!

**KIDS**

Every child is unique, of course. The age indications should therefore be seen simply as a rough guide. Note that kids' sizes correspond to height measurements in centimetres.

\* All measurements and sizes are provided for guidance only. Because of the way we optimise the fit, actual measurements may differ slightly. That's why it's best to visit your HAKRO dealer to try on the items.
